

Solutions for the waste management, recycling and extractive industries

Increasing demands

The customers' and the regulatory authorities' demands on the businesses of the waste management and extractive industries are ever increasing. In addition, competition is intensifying. As a consequence, the waste management and extractive businesses are under pressure to organise themselves more efficiently to maintain or even increase their margins in this market.

Analysis

In a first meeting, which is free of charge, we will jointly identify which opportunities to increase revenue and save costs exist within your business. The procedure which we have developed will allow you to recognise during our first meeting where exactly in your company there is potential for

Software

We not only offer you our consulting services but also the corresponding software solutions to help you implement processes. They range from order processing with the automatic generation of all necessary documents, via satellite-supported optimisation of scheduling up to electronic archiving.

All the software modules we offer have either been specially developed for the waste management and extractive industries or have been tested for usage possibilities in these sectors and have been adapted where necessary. david.net, the all-round solution for businesses in the waste management and extractive industries developed by zwei R consulting & software, has been successfully applied by over 500 users for more than 18 years.

„Working together with the team of zwei R software & consulting has led to savings of over 3,000 Euro per month within a very short time!“

Albrecht K., manager of a company with 12 employees

improvement and whether you would like to take further steps together with us to achieve your goals. The next step in the 2 R process methodology is the documentation of your business processes and their presentation in a process diagram. The comparison of your processes with the ideal process model for your company will then show the effects of changes to the existing processes and can give you precise figures as to how much you can save.

Competence

In addition to process consulting and the implementation of our own software solutions we also support our customers in the definition of performance specifications and the implementation of IT projects. The staff at zwei R consulting & software GmbH are experts in the fields of waste management and extractive industries, business process modelling and software development.
